Embolden Thy Will

OMG, enough already, just tell me!

What is Bitcoin 1776?

Bitcoin 1776 is a fork of Bitcoin block history.
On July 4th, block 530,500, we declared independence.

The subversive tax of coin minting is too high.
The political systems are too authoritarian.
And our people have suffered quite long enough.

Bitcoin 1776 is funding a global political system,
designed to unite all by an annual pilgrimage to nature.

Soon, you will be able to participate and earn coin,
by sharing your views with our world political system.

Our system is unique, and participation is in teams.
Find out more and join us, for Bitcoin 1776!

Kennedys Coin, ticker JFK.

I got an overview; now I want value.

What makes you better?

Great question!

As you already know Bitcoin 1776 requires 50x fewer costs and uses 98% less energy than Bitcoin, vastly reducing inflation and subsequent devaluation.

What you may NOT know is Bitcoin 1776 is funding a global political system designed for global outreach.

As our political blocks grow and connect, awareness and communal interest spreads, like a social virus.

Culture fuels interest while scarcity protects value.

But even better, robust volatility controls guard against unstained appreciation or rapid depreciation.

We restrict 151,375 coins to be sold at price points,
purchasing even more coins if prices fall.
Here is a snippet of a possible restriction:

Coin Sales		Funds	Coin Buys	
1,375	\$2.00	\$2,750.00 ->	\$1.60	1,719
10,000	\$2.50	\$25,000.00 ->	\$2.00	12,500
8,000	\$3.13	\$25,000.00 ->	\$2.50	10,000
6,400	\$3.91	\$25,000.00 ->	\$3.13	8,000
5,120	\$4.88	\$25,000.00 ->	\$3.91	6,400
4,096	\$6.10	\$25,000.00 ->	\$4.88	5,120
3,277	\$7.63	\$25,000.00 ->	\$6.10	4,096
2,621	\$9.54	\$25,000.00 ->	\$7.63	3,277
2,097	\$11.92	\$25,000.00 ->	\$9.54	2,621
1,678	\$14.90	\$25,000.00 ->	\$11.92	2,097

Through uniting around a stable, common currency we
create a consistent social force for demand.

With other currencies, one must wait years to buy in -
not so with Bitcoin 1776.

By combining stability, interest, scarcity, and global
inclusivity, we can have the will to change the world
and the strength to make it ours.

I'm sold! Your value proposition is strong.

But what is this governance you are going on about?

Glad – You – Asked

Open source communities are unique repositories; many people contribute freely for societal benefit.

But who benefits? That is the question of governance.

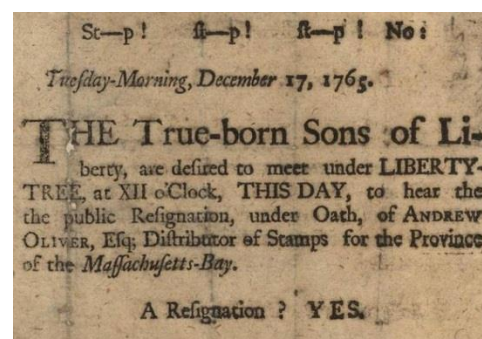

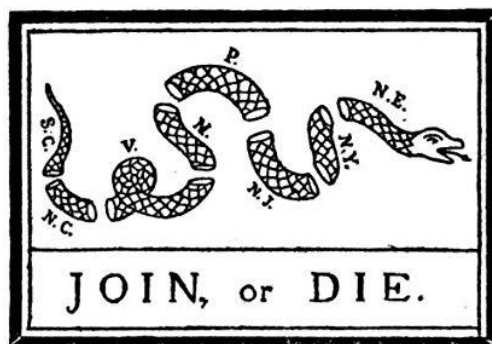

We use a standard voting system, called Democracy, but such systems can become unruly and misinformed. To counter this, we break out into teams of 8 persons and caucus issues for 1 hour prior to a vote.

Two representatives are elected and join a new table with six others, and this nested process repeats.

To promote ideas instead of personal campaigning, three candidates are chosen at random, from which one is selected, and then again, making two winners.

Selection by lot is an ancient system used to mitigate prevalence of cartels and corruption in leadership.

Finally, to minimize targeting representatives, “Franklins” rule in a council of 8. These 8 join with 24 from prior years – creating a 32 person council.

This Council of Franklins does not judge nor punish.

Instead they issue a living constitution:
prosperous instructions for a new generation.

Thus we have created an informed citizen base,
from which representatives must be chosen,
who necessarily campaign on ideas not personalities,
without predetermination thus increasing breadth,
protected from individualized violence via the council,
who act predictably as part of a multiyear process, and
are empowered to convey the art of doing good and
criticize society, but only for a short period of time.

Thanks for introducing me to your governance model, very ambitious. So you want to take over the world?

Takeover, no; a Refignation? Yes.

Here is how we throw it down.

Our primary system, called the World Series of Bitcoin, is a weeklong deliberation in a wooded encampment.

Each campsite (or jamboree) is to have up to 10,000 attendees, with odds of winning a prize nearly 1 in 8.

Oh, I think I nearly forgot the best part, prizes!!!

Prizes are paid to winning representatives the first round, but every round hereafter paid to their entire table of origin, in equal parts, making them all winners.

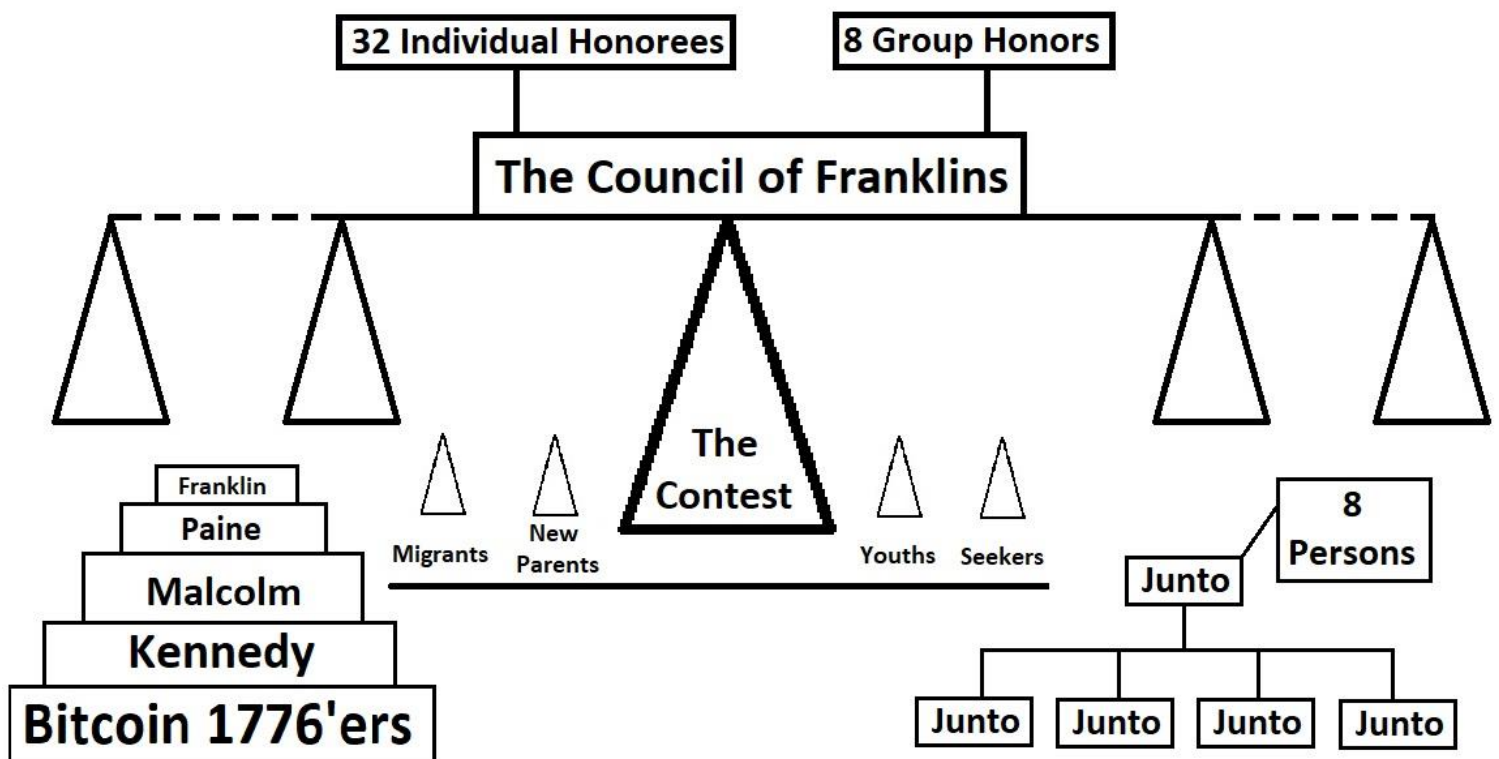

This structure encourages the foundation of support teams for leadership as an entire table wins and celebrates everyone all together.

This surplus creates investing opportunities, bridging together teams using traditional cooperative modeling. And the prizes are to be big, funded with 300,000 coins set-aside for this and likeminded objectives.

Our first contest will likely be in Tennessee. However, as funding grows it splits into 4 parts, keeping winnings between \$4 Million and \$1 Million USD per location (averaging \$400 to \$100 per attendee).

Our new locations will be spread around the world, such as Tennessee, France, Korea, or Mexico.

That is a wrap of our methods and procedures.

OK, I'm starting to get it. You get rich, and spread the riches, sure. But what is in it for everyone else?

We remember those who give, and those who have struggled.

Our voters select 32 honorees and 8 group honors per location for making societal contributions anywhere.

We bonus celebrity workers and fund innovative collectives for added contributions – not promises.

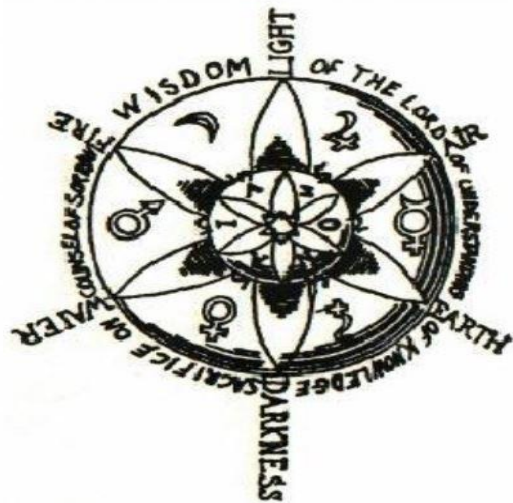

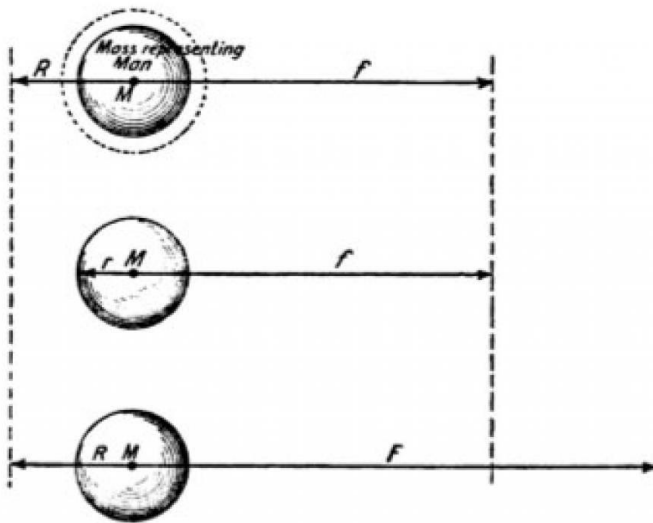

Thus we have a self-organizing economic system dependent upon one another, for funding or productive ideas, celebrating valued contributors and organizations, naturally partnering with foreign lands, creating one cohesive, predictable, political system –
all firmly grounded upon the planet earth.

Unlike isolationist systems, we aggressively expand,
enveloping thousands more per cycle.

Yet unlike Gold systems, our growth leads to wide
dispersions of public rewards and welfare.

Youths, Migrants, New Parents, and Seekers get a new
opportunity and share of wealth, just for them, to
compete among each other – for each other.

This system prevents runaway costs yet fuels
personnel growth, distributed to whom they choose.

Economically; we act as a capitalist confederacy,
Politically; we serve in a federated republic,
Socially; we are fully liberated independents,
Spiritually; we honor the dead and cherish new birth,
and together we are becoming so much more.

This really is something else! Well, I wish you luck – I can honestly say I have never seen anything like it. =)

Thank you, it has been inspiring.

At one time the idea of revolution was not so foreign.

While many people across time from many lands have guided our movement, we hope to renew their spirit.

For Life, Liberty, and Happiness – are ever changing,
yet each unalienable to us all: natural rights of birth.

“Our most basic common link is that we all inhabit this planet. We all breathe the same air. We all cherish our children's future. And we are all mortal.”

Spoke John Kennedy in 1963 in service to mankind,
uniting the world in a common mission.

“We choose to go to the Moon,” he said.

But Kennedy was a Catholic, a rich man, well-spoken; he was not like those of old, yet he built, together.

In times of old, our people were starving, naked, and unarmed in a war-torn new world – yet they fought.

“The tree of liberty must be refreshed... with the blood of patriots and tyrants. It is its natural manure,”
quoth Jefferson.

“Look upon your Hands! They are stained with the Blood of your Relations!” exclaimed Benjamin Franklin.

Again, Malcolm X fought through house bombings to lead past the “shame – and disgrace” of surrender, and Thomas Paine fought in Europe proclaiming “... my country is the world, and my religion is to do good.”

It is our belief the war is not won: so we fight.

Let us pause this freedom meditation
with the words of Robert Kennedy.

“Everyone here will ultimately be judged – will ultimately judge himself, on the efforts he has contributed to building a new world society...”

We continue this tradition at **www.bitcoin1776.org**.

You got me! I am all in. Now what do I need to do, give you lots of money? That is what you want, right?

Nope – Download and Participate

Our software is a fork of the Bitcoin Core software, written in a similar language and style (with SegWit).

Running a full Bitcoin node requires 200 GB of data, which is the same for Bitcoin 1776, with data transferences up to several gigabytes per day.

4 RAM systems can sync 10 years of data in days,
but for 1 RAM systems it can take weeks.

Once synced, you are in full control of your Kennedys, can make new wallets, or transfer coins to whomever. However, they must make a Bitcoin 1776 address, which will start with a J, F, or K (most will be K).

Best of all, if you had Bitcoins in your at home wallet prior to July 4th then you already have Kennedys!

To access your Kennedys you will need to copy and paste your old BTC wallet into our software, get a new address, and then transfer the coins.

If you would like to strengthen the network, you can open up your internet port 6703 and mine for coin. At low difficulties blocks can be found after a few hours, earning 0.25 JFK using very little energy.

Another way to participate is to visit our forums, comment, and join or make a team.

All teams must have exactly 8 members to qualify. From here you can vote and elect two representatives per voting cycle (monthly) after a one hour video discussion, earning teammate's coin.

Other ways to earn coin is by educating on coding or political history for select topics or fulfilling requests.

We welcome a wide variety of talent contributions. To find out more visit **www.bitcoin1776.org**

That sounds great and I will give it a go! Are there any worries as we go about building a “new world society”?

Sure there are! A ton of things!

In computer lingo, they call these ‘attack vectors’ which is in reference to the unbound nature of assault, but in the real world problems can arise from anywhere, intentionally or by accident.

In some respects failure of Gold systems led to the isolation of Europe and Japan, creating global war as production and innovation outpaced Golden allies.

The fiat solution brings with it its own problems: corruption, oppression, manipulation, and war.

With Bitcoin 1776 we create a bridge between Gold and cultural innovation to forestall future conflicts.

We do this by distributing coin not only for mining, but also for sharing culture and innovation, in a system designed to reduce corruption and oppression.

Is it perfect? No, but together we can make it better.

Other attacks include:

Rewind Attack – Setting the blockchain to a prior date

- Reduced by adding a BCH check point system

Fee Spam – Miners bumping fees and taking up space

- Reduced by setting subsidy to 0.25 JFK

Disruption – A variety of other 51% attacks

- Reduced by sharing a common mission & legacy

Volatility – Prices going up and down decrease access

- Reduced by a structured sales restriction

Spread of Chaos – Increasing confusion and civil strife

- Reduced by teamwork and social responsibility

Decay – Decrease of youth, science, and public interest

- Reduced by our political and welfare system

Manipulation – Private parties cornering our coins

- Reduced by distributing 99% of coins day one

Corruption – Powerful cartels seek unlimited power

- Reduced by orderly application of variance
